## Solutions First Managed Services

### Backup and Disaster Recovery (BUDR)

### A true story:

A client's server suffered a catastrophic failure due to power fluctuations. Normally, this would cripple the staff for weeks. Thanks to Focus Data Solutions' **robust backup and disaster recovery system**, our technicians swiftly restored the server image from the backup device within 24 hours, ensuring uninterrupted productivity for the staff. When the new server was installed a week later, the client's team was amazed as they had been unaware of the server's downtime.

### Our state-of-the-art BUDR solution provides:

- ✓ Critical onsite and offsite cloud storage backup to protect data from cyberthreats.
- ✓ Full backups, incremental backups and differential backups ensure backup redundancy.
- ✓ Encryption to secure backup data during transit and rest to protect it from unauthorized access.
- ✓ Continuous Data Protection, capturing and saving data changes as they occur, providing near instantaneous recovery.
- ✓ Virtual Machine BUDR enabling efficient recover of virtual machines and their data.
- ✓ Bare Metal Restore enables restorations of the entire system, including the operating stem, applications, and data onto a new machine in the event of a hardware failure.

### Why You Need a Backup and Disaster Recovery Services (BUDR):

- Protects against critical data loss.
- Minimizes downtime and maintains business continuity.
- Protects against cyber threats.
- Fulfills compliance and legal requirements.
- Builds customer trust and your company's reputation.

### How does BUDR reduce my financial exposure?

While the upfront cost may give pause, our professional BUDR plan delivers long term savings, as recovery expenses from cyberattacks, data loss or system failures far outweigh the investment in preventative measures.

### What makes Focus Data Solutions' BUDR the right choice?

BUDR, the Focus Data Solutions way, is meticulously managed with daily oversight. Unlike passive backup services, we never "set it and forget it." Our dedicated **Proactive Team**, consisting of BUDR and security experts, conducts daily backup reviews, performs file recovery tests, and ensures you have a complete and readily available backup at any given moment.
